

Hi!

Note: The important thing about this project is I assume it will be very easy, but I suppose what matters is your creativity and presentability.

Task

Create a single-page personal website from scratch with HTML and CSS.

The content for the personal website is basically mine. I have different categories for what appears as content.

The restrictions for this project are light. Have fun with this!

- **PLEASE PLEASE PLEASE DO NOT use a website template.** The point of the project is to show me what **you** can do.
- You should definitely use CSS and JavaScript. If you would like to use a library, I highly prefer jQuery.
- Make the different sections on the page easy to add on to or manipulate
- Since you are a programmer, what would you like on your personal website?
- A personal site that inspires me: <http://seanhalpin.io/>

Criteria

Content

In this personal website, you will have my full name, an elegant logo that matches this, an 'About' section, my accolades, my coding projects, and a contact me section (no submission box). I highly prefer interactive components that is personally connected to me.

Style

Although style can be subjective, this website should have a clear intentional style. A consistent color palette, font, and imagery should play a role in the overall look and 'feel' of the website. The style I am looking for is cartoonish, quirky, fun, and colorful. I also would like one key animation, be creative!

Code

The HTML and CSS documents should be clear and organized.

BONUS

Any additional effort or complexity I will appreciate.

SUBMISSION

Please only submit to me the files (source files). Do not host the website.

Sections

Name: Mehdi XXXXXXXX

My Story (put pictures)*

I am a current senior at XXXXXXXXXXXXXXXXXXXX and am actively pursuing the Software Engineering Track. As a kid, I loved playing around with code, learning from my father create exciting programs. Even now, I still am learning more and more about Computer Science and its implications in society today. I love programming in Python, Javascript, Java, and talking about code. I am most interested in the intersection between Artificial Intelligence and Ethics, which concern most of us today.

*I may add on later so it is more filled up

Working Experience

Bobby-Tariq Learning Center, K-12 Instructor

September 2019 - Present

- Teach students from Kindergarten to Grade 12 in Math, Science, English (including SAT & SHSAT), and Computer Science
- Provide clerical support for diverse needs and personalized phone calls to parents
- Organize work for students, which includes, creating syllabi, photocopying workbooks, and printing out test materials

OpenWave Computing LLC, *Marketing and Software Tester*

Summer 2019

- Revised front-end displays of company's newly launched field management software called QuikAllot
- Advocated for new software features by comparing competitors in the industry to identify advantages/disadvantages based on market trends
- Assisted in coordinating various marketing methods including, direct mail, print ads, networking, social media, mass mailing, and developed new methods of marketing
- Identified potential clients and followed up on cold leads from client contacts and office sources for company products

Volunteer Experience

Bobby-Tariq Learning Center, *Tutor and Editorial Assistant*

January - September 2019

- Design SAT Math Quizzes, 100-Question Advanced Math Packets, and full-length Math Tests
- Edit company books and recommend tactics to improve program effectiveness
- Spearheaded group tutoring sessions as well as one-on-one and give feedback for SAT students

New York Youth Tech Team, *Python Teacher and Assistant*

July 2019 - August 2019

- Mentored students during team coding projects (eg. Password Breaker) and explained key coding concepts emphasizing code readability and efficiency
- Led Python classroom which implemented Python control flow and mastery of the language

Queens Library, *Monitor and Assistant*

March - July 2019

- Assisted 8 middle school students with homework assignments, projects, and upcoming subject tests
- Helped prioritize assignments and consulted with staff to easily access library materials and information

Salt Tree Charitable Trust, *Registration and Pop-up Gallery Overseer*

April - May 2019

- Assisted in honey bee-related art and performance, featuring a Guinness World Record attempt for the largest performance of the honey bee waggle dance
- Advised parents and children with community crafts and education tables involving animal awareness

Accolades (something interactive, maybe confetti)

National College Match Finalist, QuestBridge College Prep Scholar, CTE Scholar, AP Scholar, Teacher of the Month

Projects

FILL THIS WITH MULTIPLE LOREM IPSUM

Favorite Movies (very interactive)

- **Police Story**
- **Rush Hour**
- **Drunken Master**
- **Etc**

Favorite Shows (very interactive)

- **You**
- **Lucifer**
- **iZombie**
- **Money Heist**
- **Mr. Robot**
- **Sex Education**
- **Limitless**
- **Jane the Virgin**
- **Breaking Bad**
